

ABSTRACT

Gankyrin having the amino acid sequence as set forth  
in SEQ ID NO: 2, or modified gankyrin comprising an amino  
5 acid sequence modified by the deletion and/or addition of  
one or a plurality of amino acids and/or the substitution  
with other amino acids in the amino acid sequence of SEQ  
ID NO: 2 and retaining the biological activity of  
gankyrin, a gene encoding it, and a method of preparing  
10 said protein and uses thereof.
